
DISTRICT CENSUS HANDBOOK
1951

DEORIA DISTRICT

FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies. The printing of the District Census Handbooks involves colossal work and is bound to take some time.

RAJESHWARI PRASAD, I.A.S.,

Superintendent, Census Operations,

Uttar Pradesh.

RAMPUR:

December 20, 1954.

INTRODUCTION

A—THE DISTRICT

1. The district of Deoria occupies the extreme north-east corner of Uttar Pradesh. It has been carved out of the old district of Gorakhpur which was split up in 1946 into the districts of Gorakhpur and Deoria. On the west the border marches with Gorakhpur. To the north and east are the Champaran and Saran districts of Bihar, the dividing line being partly artificial and in part supplied by the Great and Little Gandak rivers. It is bounded on the south by the Ghagra, which separates it from Azamgarh and Ballia. In 1951 the total area of the district was 2,087 square miles and the total population was 21·03 lakhs, the fourth biggest among the districts of the State. It has 4 tehsils, 6 parganas and 17 thanas.

2. In its general aspect the district presents the appearance of a level alluvial plain. Tehsil Padrauna forms the northern portion of the district. As a whole the tehsil is a fertile plain with a gentle slope in a south-easterly direction, the level surface being diversified only by the river valleys and a few sandy ridges, one of which, between Kasia and Padrauna, rises to a height of about 386 feet above the sea and is the greatest natural eminence in the district. Formerly a large area of this tehsil was covered with forests, but the whole of this has long disappeared. There are, however, many extensive tracts of bush and scrub jungle in the north, and in places along the Gandak wide stretches of grassy waste are to be found. The area of cultivation in the valley of that river, known locally as the *dhab*, is small, for this part of the tehsil is always liable to damage from the sudden and violent floods to which the stream is periodically subject. Most of the country is a *bhat* tract. Tehsil Hata is a very fertile plain with a gently undulating surface, marked in places by low sandy ridges. Practically the whole of the area belongs to the upland *bangar*, though the eastern edge projects into the *bhat* zone, while in the extreme south lies a small strip of *kachhar*. The south-eastern part of the district comprises of the tehsils of Salempur and Deoria. The greater part of the area belongs to the upland *bangar* and is a stretch of extremely fertile and highly tilled soil, the level surface being broken only by occasional ridges of sand and the few river valleys, the chief of which is that of the Little Gandak. Along the Rapti and Ghagra is a somewhat narrow strip of *kachhar* or new alluvium which is liable to damage from floods ; while in the extreme north-east corner is a compact block of *bhat*, resembling that of tehsil Padrauna.

Topography

3. River Ghagra forms the southern boundary of the district and the drainage of the entire district ultimately discharges itself into it excepting that carried off by the Great Gandak. River Rapti, a powerful stream, separates the south-western part of the district from Gorakhpur. The river frequently changes its course and its *kachhar* is liable to floods. The little Gandak traverses the eastern portion of the district from north to south receiving the Khanua on its left bank. It receives several tributaries, of which the chief are the Maun and the Duranchi. Majhna is another important stream in tehsil Hata. It joins the Rapti, receiving on its right bank the Katna and on its left the Karna. In the extreme south-east of the district are the Siahi and Jharai, the latter for some miles forming the district boundary. In tehsil Padrauna, in addition to the Great and Little Gandak there are several other streams. In the north Banri takes its rise, joining the Bansi, an old channel of the river Gandak ; while the Jharai rising on the eastern border takes a southerly course and flows past into Saran district. In the west the chief stream is Khanua. A noteworthy peculiarity of the lesser rivers in this tehsil is that they generally flow along ridges and spill into each other. Throughout the Padrauna tehsil small lakes and *jhils* are to be found, but there are no great sheets of water excepting the Rainabhar Tal near Kasia. In tehsil Hata there are no lakes of any importance though a large number of ponds and *jhils* are to be found scattered throughout the country. In tehsils Deoria and Salempur also there are no lakes of any importance though small *jhils* and *dahars* or deserted river beds occur in numbers throughout.

Drainage

4. The prevailing and characteristic soil of tehsil Padrauna and of an extensive block in the eastern extremity of tehsil Deoria, is *bhat*. The *bhat* tract consists of alluvium the distinguishing feature being its remarkable whiteness which is due to the unusual proportion of carbonate of lime in the soil. This soil is retentive of moisture and so artificial irrigation is practically unknown. The remainder is either *bangar* or *kachhar*. In the tehsils of Hata, Deoria and Salempur a greater part of the area belongs to upland *bangar*. Along the Rapti and Ghagra is a somewhat narrow strip of *kachhar*. The prevalent soil of these tehsils is *doras* or loam. The balance is either *matiar* or *balua*. A noteworthy feature throughout the whole of Deoria is the almost entire absence of sterile *usar* plain, so common in Avadh (Lucknow and Faizabad divisions) and in the Banaras division to the south.

Soils

Classification of area

5. The figures of the classification of area are given in Table 2 of Part III of this volume. The proportion of area under various categories works out as follows for 1950-51 :

| Particulars | | | | | | | Actual figures (in acres) | Percentage |
|--|----|----|----|----|----|----|---------------------------|------------|
| Cultivated area | .. | .. | .. | .. | .. | .. | 1,066,326 | 79.6 |
| Culturable waste (excluding current fallow) | .. | .. | .. | .. | .. | .. | 112,367 | 8.4 |
| Current fallow | .. | .. | .. | .. | .. | .. | 47,578 | 3.5 |
| Forest | .. | .. | .. | .. | .. | .. | 27 | 0.0 |
| Area not available for cultivation of which— | | | | | | | 113,611 | 8.5 |
| (a) Covered with water | .. | .. | .. | .. | .. | .. | 49,056 | 3.7 |
| (b) Under sites, roads and buildings | .. | .. | .. | .. | .. | .. | 50,865 | 3.8 |
| (c) Barren | .. | .. | .. | .. | .. | .. | 13,690 | 1.0 |

The figure in the above table regarding culturable waste taken from the Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50 a detailed enquiry through the District Officers regarding the nature of this area in each district. The following analysis of the area resulted from this enquiry :

| Particulars | | | | | | | Area (in acres) | Percentage |
|---|----|----|----|----|----|----|-----------------|------------|
| Total culturable waste (A + B + C) | .. | .. | .. | .. | .. | .. | 107,939 | 100 |
| A—Area under culturable waste land not available for immediate cultivation | .. | .. | .. | .. | .. | .. | 68,321 | 63.30 |
| (i) Forest under any legal enactment | .. | .. | .. | .. | .. | .. | 270 | 0.25 |
| (ii) Groves | .. | .. | .. | .. | .. | .. | 44,871 | 41.57 |
| (iii) Forests of timber trees | .. | .. | .. | .. | .. | .. | 338 | 0.32 |
| (iv) Thatching grasses, shrubs and bushes | .. | .. | .. | .. | .. | .. | 2,591 | 2.40 |
| (v) Land kept for grazing | .. | .. | .. | .. | .. | .. | 20,251 | 18.76 |
| B—Area under culturable waste land available for immediate cultivation but could not be cultivated | | | | | | | 8,431 | 7.81 |
| Of which due to— | | | | | | | | |
| (i) <i>Kans</i> growth | .. | .. | .. | .. | .. | .. | 1,234 | 1.14 |
| (ii) Threshing floors | .. | .. | .. | .. | .. | .. | 3,231 | 2.99 |
| (iii) Malaria | .. | .. | .. | .. | .. | .. | .. | .. |
| (iv) Floods | .. | .. | .. | .. | .. | .. | 191 | 0.18 |
| (v) Lack of drains | .. | .. | .. | .. | .. | .. | 227 | 0.21 |
| (vi) Lack of water | .. | .. | .. | .. | .. | .. | 146 | 0.14 |
| (vii) Distance from <i>atadi</i> . | .. | .. | .. | .. | .. | .. | 792 | 0.73 |
| (viii) Damage from wild animals | .. | .. | .. | .. | .. | .. | 355 | 0.33 |
| (ix) Other causes | .. | .. | .. | .. | .. | .. | 2,255 | 2.09 |
| C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against 'B' | | | | | | | 31,187 | 28.89 |

From the above it will appear that of the total area recorded as cultivable waste, only 28.9 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and cultivable including current fallow *per capita* works out to 58.3 cents of which 53.0* cents have already been brought under cultivation and only about 1.5 cents can be further brought under the plough after some improvements. It is obvious that the saturation point for cultivation has already been reached in the district.

Climate and rainfall

6. The rainfall is normally ample. The average for the last quinquennium was about 51 inches. During the last fortyfive years the rainfall in Gorakpur-cum-Deoria has been less than 30 inches in only one year and has been usually over 40 inches. The rainfall in combination with the effect of numerous rivers and remarkably high water level renders the soil damp and the climate moist. The climate of the district is far more equable than that

*This figure also includes the area classed as current fallow.

in the western districts. Extremes of heat and cold are rarely experienced. Dust storms are of rare occurrence for in almost all seasons the wind blows from the east, and if not so invigorating is at least cooler than the fery blasts of western districts. It had the evil reputation of fever but the matters have greatly improved due to the reclamation of almost the whole of forest area and extension of cultivation. Padrauna tehsil is still considered to be unhealthy, especially those parts which border on the *tarai* since fever is very much prevalent there during and immediately after rains. The people in this tehsil as a rule are of poor physique, and the water of the *bhat* tract is said to be responsible for the unusual prevalence of goitre.

7. Irrigation is derived from wells, rivers, tanks, lakes and other natural reservoirs. There is practically no irrigation by canal. In 1950-51 the irrigated area from wells covered 76·8 per cent. and by other sources 23·2 per cent. In the large tracts comprising *bhat* and *kachhar* irrigation is either unnecessary or not feasible.

8. More acreage is sown under *kharif* than in *rabi* crops. The area under *kharif* in 1950-51 was 848,767 acres ; that under *rabi* 551,254 acres ; and that under *zaid* crops 6,437 acres. The principal *kharif* crop is paddy followed by maize which is extensively produced in Padrauna. Sugarcane is an important crop of the district. Area under it has increased since 1930 as a result of the establishment of vacuum pan sugar factories. The principal *rabi* crop is barley followed by wheat, peas and oilseeds.

B—ANALYSIS OF THE STATISTICS

1. The table below shows the two basic figures—land area and population—and the derived figures of land area *per capita*.

| Tehsil | | | | | Population (in lakhs) | Density (number per square mile) | Land area (in lakhs of acres) | Land area <i>per capita</i> |
|-----------------|----|----|----|----|--------------------------|---|-------------------------------------|--------------------------------|
| Deoria | .. | .. | .. | .. | 5·30 | 1,076 | 3·16 | 0·59 |
| Hata | .. | .. | .. | .. | 4·85 | 888 | 3·49 | 0·72 |
| Padrauna | .. | .. | .. | .. | 5·49 | 982 | 3·58 | 0·65 |
| Salempur | .. | .. | .. | .. | 5·39 | 1,088 | 3·17 | 0·59 |
| Deoria district | .. | .. | .. | .. | 21·03 | 1,005* | 13·40 | 0·64 |

This district though twenty-second in order of area stands fourth in the State in respect of population. It is one of the four districts with a density of over 1,000 while the average density of the State is 557 only. The density of the district has not been to a great extent inflated by the presence of large towns. Even the rural density of the district is as high as 980 persons per square mile, the highest in the State, the density of the rural parts of the tehsils being : Deoria 1,026, Hata 889, Padrauna 967 and Salempur 1,049. It is to be noted that the district as a whole has got one of the lowest figures of land area *per capita*. The only district with a lower land area *per capita* in the State is Lucknow. (*Vide* Tables A-I and E.)

2. The growth of population in the district during the last fifty years has been phenomenal. The population of the district in 1951 was 41·3 per cent. higher than what it was fifty years ago. Compared to this the increase in population of the State during the corresponding period has been only 30 per cent. The table below exhibits the variation in the total, rural and urban population for the last five decades.

| | | | | Population | | | Variation | | |
|-------------|----|----|----|------------|-----------|--------|---------------------|---------------------|--------------------|
| Census year | | | | Total | Rural | Urban | Total | Rural | Urban |
| 1901 | .. | .. | .. | 1,487,801 | 1,447,704 | 40,097 | | | |
| 1911 | .. | .. | .. | 1,620,214 | 1,580,531 | 39,683 | +132,413 (+8·9) | +132,827 (+9·2) | —414 (—1·0) |
| 1921 | .. | .. | .. | 1,653,979 | 1,593,030 | 60,949 | +33,765 (+2·1) | +12,499 (+0·8) | +21,266 (+53·6) |
| 1931 | .. | .. | .. | 1,766,188 | 1,712,593 | 53,595 | +112,209 (+6·8) | +119,563 (+7·5) | —7,354 (—12·1) |
| 1941 | .. | .. | .. | 1,969,913 | 1,907,537 | 62,376 | +203,725 (+11·5) | +194,944 (+11·4) | +8,781 (+16·4) |
| 1951 | .. | .. | .. | 2,102,627 | 2,029,797 | 72,830 | +132,714 (+6·7) | +122,260 (+6·4) | +10,454 (+16·8) |

*According to the area given by Surveyor General, it is 1,007,

A noteworthy feature is that between 1901 and 1921 the population of the district recorded an increase of 11·2 per cent. when that of the State decreased by 4 per cent. In spite of the heavy mortality from the influenza epidemic in 1918-19, an increase (though small) was recorded for the decade 1911—21. But the population of the district recorded only an increase of 27·1 per cent. since 1921 against an increase of 35·5 per cent. in the population of the State during the same period. During the last decade the population of the district increased only by 6·7 per cent. as compared to the increase of 11·8 per cent. in the population of the State. It appears that migration from the district, in search of occupation, has been the main cause of this low growth.

The variation in the population of the tehsils during 1941—51 is shown in the marginal

| Tehsil | Percentage variation 1941-51 |
|-----------------|------------------------------|
| Deoria district | +6.7 |
| Deoria | +9.9 |
| Hata | +5.6 |
| Padraun | +7.1 |
| Salemgarh | +4.5 |

table. In Deoria tehsil, the large increase is chiefly due to the growth of Deoria town.

The Vital Statistics

3. Births and deaths mainly account for the trends in population growth. Migration also is a factor though of lesser importance. The following table gives the mean decennial registered birth and death rates and the calculated natural increase rates and population growth rates of the last three decades for Gorakhpur-*cum*-Deoria districts as a whole and for their rural and urban areas :

| | | | | Total | Rural | Urban |
|--|----|----|----|-------|-------|-------|
| <i>Mean decennial birth-rate</i> | | | | | | |
| 1941—50 | .. | .. | .. | 20·3 | 20·1 | 24·1 |
| 1931—40 | .. | .. | .. | 30·5 | 30·7 | 25·9 |
| 1921—30 | .. | .. | .. | 30·0 | 30·6 | 17·9 |
| <i>Mean decennial death-rate</i> | | | | | | |
| 1941—50 | .. | .. | .. | 14·2 | 14·0 | 17·1 |
| 1931—40 | .. | .. | .. | 18·8 | 18·7 | 19·9 |
| 1921—30 | .. | .. | .. | 18·4 | 18·6 | 13·4 |
| <i>Mean decennial rate of natural increase</i> | | | | | | |
| 1941—50 | .. | .. | .. | 6·1 | 6·1 | 7·0 |
| 1931—40 | .. | .. | .. | 11·7 | 12·0 | 6·0 |
| 1921—30 | .. | .. | .. | 11·6 | 12·0 | 4·5 |
| <i>Mean decennial growth-rate</i> | | | | | | |
| 1941—50 | .. | .. | .. | 9·1 | 8·5 | 20·0 |
| 1931—40 | .. | .. | .. | 10·5 | 10·1 | 19·5 |
| 1921—30 | .. | .. | .. | 8·8 | 8·9 | 6·1 |

There are large omissions in the registration of births as well as deaths and so the above rates do not represent the true picture at all. They may, however, be taken to be roughly indicative of trends. Both birth and death rates have fallen during the last decade.

The figures of natural increase and growth-rate suggest considerable loss of population by migration during 1921—30 and 1931—40 and gain during 1941—50. Owing to the very high density of population the district has been always sending out emigrants. The reverse trend during 1941—50 appears to be the result of inaccurate data.

The average yearly mortality from various causes in Gorakhpur-*cum*-Deoria during 1941—50 was as follows :

| Causes | | | | | | | | Number of deaths | Percentage of total deaths |
|----------------------------------|----|----|----|----|----|----|----|------------------------|----------------------------------|
| Fever | .. | .. | .. | .. | .. | .. | .. | 45,085 | 76·6 |
| Dysentery and diarrhoea .. | | | .. | .. | .. | .. | .. | 435 | 0·7 |
| Respiratory diseases .. | | | .. | .. | .. | .. | .. | 407 | 0·7 |
| Plague, cholera and small-pox .. | | | .. | .. | .. | .. | .. | 8,915 | 15·1 |
| Others | .. | .. | .. | .. | .. | .. | .. | 4,052 | 6·9 |

As in the rest of the State 'fever' is responsible for a majority of the deaths. But fever covers a number of ailments which the reporters are unable to identify. Deaths from plague, cholera and small-pox are among the highest in the State. This area has been always most susceptible to epidemics. (*Vide* Table I, Part III of this volume)

4. Migration does not appear to have contributed to the growth of population of the district at any time. About 96 per cent. of the people enumerated in the district at the census of 1951 were born there. 1·8 per cent. were born in the other districts of the State and 2·2 per cent. were born in other parts of India. Of the immigrants from the districts of the State as many as 36,691 (males 6,124, females 30,567) are from the other districts of the same natural division and only 819 (males 330, females 489) are from other parts of the State. Most of the migration from the neighbouring districts is marriage migration. Of the 44,764 immigrants from the adjacent States 43,465 (males 5,355, females 38,110) are from Bihar; 530 (males 319, females 211) are from the Punjab and 492 (males 265, females 227) are from Rajasthan. The immigration from Bihar is mostly marriage migration.

Migration

Of the immigrants who have come from territories beyond India 351 (males 131, females 220) were born in Pakistan and 389 (males 180, females 209) had their birth place in other territories. The Pakistan-born are the displaced persons who number 553. Of them 73·8 per cent. have come from West Pakistan, 13·4 per cent. from East Pakistan and 12·8 per cent. from districts which could not be traced. Of the immigrants in other territories 341 (males 159, females 182) are Nepal-born.

Of the 61 non-Indian nationals, 45 belong to Nepal, 7 are Swiss, 6 British, 2 Italian and 1 Afghan.

Emigration from Deoria is more important than immigration to it but unfortunately the figures of emigration are not available. From the figures in the previous Census Reports we also know that losses by migration to distant States and to territories beyond India are mainly borne by the districts of East Plain division and certain districts of Central Plain division. Deoria is one of these emigrating districts. (*Vide* Tables D-IV and D-VI)

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation during the same period. The combined figures for Gorakhpur-cum-Deoria districts are exhibited in the marginal table. (Figures of area

Decline of cultivation per capita

| Census year | Population | Net area sown (in acres) | Area of cultivation per capita (in cents) |
|-------------|--------------|--------------------------|---|
| 1921 | .. 3,266,830 | 2,115,003 | 73·7 |
| 1931 | .. 3,567,561 | 2,158,474 | 60·5 |
| 1941 | .. 3,963,574 | 2,172,662 | 54·8 |
| 1951 | .. 4,341,215 | 2,170,334 | 50·1 |

shown under census years are quinquennial averages for the five years ending with the crop year immediately preceding the census years). It is obvious that cultivation has failed to keep pace with population. The cultivated area *per capita* has gone down to 50·1 cents in 1951 from 73·7 cents in 1921. The magnitude of this drop is about one-third of the 1921 level. It means that (other things being equal) every man, woman and child must expect to get less food and other agricultural

produce from the land in 1951 than in 1921.

6. It may be examined whether this shortage has been compensated by an increase in the yield per acre. Increase in yield can be brought about by more double cropping, more irrigation, better fertilisation and better culture. The average (quinquennial) area sown more than once was 625,472 acres in 1921 for the district Gorakhpur-cum-Deoria. It slightly increased to 652,880 acres in 1931. There was a substantial increase to 724,440 acres in 1941. But in 1951 there was a drop to 549,152 acres due to drought conditions. The figures of double crop cultivation *per capita* in cents are as below :

Double cropped area per capita.

| Particulars | Quinquennial averages for the year preceding | | | |
|--|--|------|------|------|
| | 1951 | 1941 | 1931 | 1921 |
| Double crop cultivation <i>per capita</i> in cents | 12·7 | 18·3 | 18·3 | 19·1 |
| Unirrigated double crop cultivation <i>per capita</i> in cents | 12·5 | 18·2 | 18·2 | 18·0 |
| Irrigated double crop cultivation <i>per capita</i> in cents | 0·2 | 0·1 | 0·1 | 1·1 |

It is evident that the double cropped area has not kept pace with the rate of growth of population.

**Irrigated area
per capita**

7. The average area irrigated in Gorakhpur-*cum*-Deoria districts was 719,168 acres in 1921. The figures were 654,042 acres for 1931, 835,620 acres for 1941 and 784,166 acres for 1951. The average area irrigated more than once was 36,084 acres in 1921, 3,101 acres for 1931, 2,235 acres for 1941 and 8,025 acres for 1951.

The figures of irrigation *per capita* are shown in the table below :

| Particulars | Years | | | |
|--|-------|------|------|------|
| | 1951 | 1941 | 1931 | 1921 |
| Irrigated single crop cultivation <i>per capita</i> in cents | 17.9 | 21.0 | 18.2 | 20.9 |
| Irrigated double crop cultivation <i>per capita</i> in cents | 0.2 | 0.1 | 0.1 | 1.1 |

The trend is distinctly towards a decline.

Cropped area

8. It is also significant that in spite of the rapid growth of population there has been almost no change in the cropping pattern of the district. During the quinquennium 1916—21 90.8 per cent. of the cropped area was under food crops and only 9.2 per cent. of it was under non-food crops. Thirty years after, during 1946—51 the cropped area under food crops was 90.9 per cent. and that under non-food crops was 9.1 per cent.

The proportionate area under different crops in Gorakhpur-*cum*-Deoria districts between 1911 and 1951 was as below :

| Quinquennial average of | | | | Total cropped area | Percentage of cropped area under | | | | | |
|----------------------------|----|----|----|--------------------------|----------------------------------|-------|--------|-------|------|--------|
| | | | | | Rice | Wheat | Barley | Maize | Gram | Others |
| 1911—16 | .. | .. | .. | 2,808,497 | 34.0 | 11.6 | 12.2 | 3.8 | 5.8 | 32.6 |
| 1916—21 | .. | .. | .. | 2,715,803 | 34.5 | 11.5 | 12.2 | 3.5 | 5.1 | 33.2 |
| 1921—26 | .. | .. | .. | 2,834,628 | 34.6 | 12.1 | 11.6 | 3.0 | 6.5 | 32.2 |
| 1926—31 | .. | .. | .. | 2,805,891 | 33.0 | 14.4 | 10.9 | 3.2 | 4.7 | 33.8 |
| 1931—36 | .. | .. | .. | 2,810,426 | 31.3 | 15.0 | 11.4 | 3.2 | 4.1 | 35.0 |
| 1936—41 | .. | .. | .. | 2,878,486 | 33.1 | 12.5 | 10.8 | 2.3 | 3.4 | 37.9 |
| 1941—46 | .. | .. | .. | 2,794,458 | 30.2 | 12.9 | 12.8 | 2.8 | 4.2 | 37.1 |
| 1946—51 | .. | .. | .. | 2,860,165 | 31.7 | 12.0 | 13.7 | 2.7 | 3.1 | 36.8 |

Cotton and Indigo are the two non-food crops which have gone out of cultivation. In 1901-02 the area under cotton crop was 761 acres ; in 1950-51 it was only 17 acres. In 1901-02 the area under Indigo was 14,753 acres, while in 1950-51 it was nil. Sugarcane is one of the most important crops of the district and its area has risen considerably since 1930, with the establishment of sugar factories.

**Live-stock, ploughs
and carts**

9. Live-stock in this country live for a large part of the year on by-products of agriculture supplemented by green fodder crops. They have, therefore, to be co-related not only with the grazing available but also with the total area under cultivation which carries a major portion of the burden of supporting the cattle population.

As will appear from Table 3 of Part III the total number of cattle and buffaloes ; which had been decreasing from 1930 up to 1944 has during 1944—51 increased from about 13 lakhs to about 15 lakhs in the districts of Gorakhpur-*cum*-Deoria.

The number of working cattle and buffaloes in the two districts had been steady at about 7 lakhs from 1920 till 1944. But it has increased to about 8 lakhs between 1944—51. This number of working cattle appears to be governed by the number of ploughs and carts. The number of ploughs has gone up from 3.18 lakhs in 1944 to a little over 4 lakhs in 1951 due apparently to progressive fractionalisation of holdings. The number of carts started rising since 1930 as a result of the establishment of sugar factories and stands now at over 88,000. The average net cultivated area per plough works out to 5.31 acres in 1951 as against 6.36 acres in 1920 and the average net cultivated area per pair of working cattle works out to 5.45 acres in 1951 as compared with 5.87 in 1920.

Breeding cows and shebuffaloes which fell from 4.77 lakhs to 4.40 lakhs during 1935—44 have gone up to 5.22 lakhs in 1951. The cows and female buffaloes in milk per 1,000 of human population were 30 and 16 respectively. Owing to the poor milk yield the share of milk per head is only a few ounces per day.

The number of sheep which had been almost stationary at about 60,000 for 1920—44 has suddenly gone down to about 53,000 due apparently to shortage of pasture. Goats

have been going down in number since 1930, when they were over 6 lakhs. Their number in 1951 was under 2 lakhs, the reduction during 1944—51 alone being about 50 per cent.

Horses and ponies also are declining in number. There was a steep fall during 1944—51 from about 9,000 to under 5,000. Donkeys during the same period were reduced from over 13,000 to about half the number.

Poultry continues to be steady at about 40,000.

Distributed on 1,000 of human population the figures of the main categories of live-stock in 1951 forDeoria are as follows :

| Cattle | Buffaloes | Sheep | Goats | Poultry | Others |
|--------|-----------|-------|-------|---------|--------|
| 326 | 55 | 15 | 122 | 12 | 15 |

10. To sum up, the population of the district is growing up almost at the biological natural rate since 1921. But on the other hand, the land area *per capita*, the double crop area *per capita* and the irrigated area *per capita* are steadily declining. There is, at the same time, no evidence that crop yield per acre has increased nor has there been a change in the cropping pattern. The cultivated area *per capita* in the district has now grown so small that even a slight disturbance by drought or flood is likely to cause serious scarcity conditions. In fact the district is marked out as a danger spot from the point of view of the food situation of the State.

11. The district has 3,547 villages and 7 towns. Out of about 21·0 lakhs of people who were counted at the census of 1951, 20·3 lakhs were found in the villages and 0·7 lakhs in the towns i.e., there are as many as 965 people per 1,000 of the population who live in the rural areas and only 35 of them live in the towns. The corresponding figures for the State as a whole are : rural 864, urban 136.

Villages and towns

The rural population per inhabited village works out to 572. But the villages do not necessarily comprise of a single compact size. There are 8,440 hamlets in the district. The population per hamlet is only 240. The medium-sized village—with inhabitants numbering between 500—2,000—is the dominant type in the district. Of the rural population 57·8 per cent. live in such villages ; 27·2 per cent. live in small villages of population under 500 ; 12·0 per cent. live in large villages of a population between 2,000—5,000 ; and only 3·0 per cent. live in villages of population over 5,000 and over.

Only 11·0 per cent. of the urban population lives in towns of population under 5,000 (viz., Rampur and Captainganj) ; 24·6 per cent. of the urban population lives in towns of population between 5,000—10,000 (viz., Lar and Rudarpur) ; 36·7 per cent. of the urban population lives in towns of population between 10,000—20,000 (viz., Gaura-Barhaj and Padrauna) ; and 27·7 per cent. of the urban population lives in towns of population of 20,000 and over (viz., Deoria). It is significant to note that Deoria and Lar which have recorded 32·6 per cent. and 47·5 per cent. increase in population since 1941 appear to be the rising towns of the district. Gaura-Barhaj and Padrauna have recorded an increase of 11·9 per cent. and 10·5 per cent. respectively since 1941. The increase in the population of Rudrapur has been only 2 per cent. while the population of Rampur and Captainganj has decreased by 2 per cent. and 8·3 per cent. respectively. These towns appear to be on the decline. (*Vide* Tables A-III and A-IV.)

12. Out of the total population of 2,102,627 (2,029,797 rural, 72,830 urban) 1,966,165 (1,943,575 rural, 22,590 urban) or 93·5 per cent. depend on agriculture for their means of livelihood and 136,462 (86,222 rural, 50,240 urban) or 6·5 per cent. depend on the non-agricultural sources. The following table gives the distribution of 100 persons of the total, rural and urban population of the district under the different livelihood classes.

Occupations :
Livelihood pattern

| Description | Agricultural classes | | | | | Non-agricultural classes | | | | |
|-------------|----------------------|------|-----|-----|-----|--------------------------|------|------|-----|------|
| | Total | I | II | III | IV | Total | V | VI | VII | VIII |
| Total | 93·5 | 85·9 | 1·6 | 5·9 | 0·1 | 6·5 | 1·9 | 1·7 | 0·3 | 2·6 |
| Rural | 95·7 | 88·0 | 1·6 | 6·0 | 0·1 | 4·3 | 1·4 | 0·9 | 0·2 | 1·8 |
| Urban | 31·0 | 25·4 | 1·4 | 3·3 | 0·9 | 69·0 | 16·9 | 23·5 | 2·9 | 25·7 |

It is obvious that this district is one of the predominantly agricultural districts of the State. Here as many as 93·5 per cent. of the people depend on agriculture as against 74·2 per cent. in the State as a whole.

Of the total population of the district 1,055,087 persons (436,228 males, 618,859 females) or 50·2 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in the agricultural population works out to 49·9 and that among the non-agricultural classes as 54·9. It will be observed that in the main they consist of women. The male non-earning dependants are mostly children. 501,545 persons (141,047

males, 360,498 females) or 23· 8 per cent. of the population are earning dependants. Among the agriculturists their proportion is 24· 8 per cent. and among non-agriculturists they form only 10· 0 per cent. Agriculture is a family occupation and it provides work to the women and grown-up children in the family. The remaining 545,995 persons (472,653 males, 73,342 females) or 26· 0 per cent. of the population consists of self-supporting persons. Their proportion among agriculturists is 25· 3 per cent. and among non-agriculturists 35· 1 per cent. Of the self-supporting persons 498,060 (431,252 males, 66,808 females) belong to agricultural classes and 47,935 (41,401 males, 6,534 females) to the non-agricultural classes. On an average a self-supporting person maintains two non-earning dependants.

Of the 47,936 self-supporting persons belonging to the non-agricultural classes 1,612 persons (1,431 rural, 211 urban) earn their livelihood from non-productive sources. Of the remaining 46,293 self-supporting persons (32,402 rural, 13,891 urban) 3,122 (2,091 rural, 1,031 urban) or 6· 7 per cent. are employers ; 17,058 (12,001 rural, 5,054 urban) or 36· 9 per cent. are employees and 26,113 (18,307 rural, 7,806 urban) or 56· 4 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations classified according to the Economic Divisions is as follows :

| Name of division | | | | | | Self-supporting persons by divisions |
|---|----|----|----|----|----|--------------------------------------|
| All Industries and Services | .. | .. | .. | .. | .. | 10.000 |
| 0—Primary industries not elsewhere specified | .. | .. | .. | .. | .. | 158 |
| 1—Mining and quarrying | .. | .. | .. | .. | .. | 6 |
| 2—Processing and manufacture—foodstuffs, textiles, leather and products thereof | .. | .. | .. | .. | .. | 1,449 |
| 3—Processing and manufacture—metals, chemicals and products thereof | .. | .. | .. | .. | .. | 220 |
| 4—Processing and manufacture—not elsewhere specified | .. | .. | .. | .. | .. | 1,331 |
| 5—Construction and utilities | .. | .. | .. | .. | .. | 132 |
| 6—Commerce | .. | .. | .. | .. | .. | 2,157 |
| 7—Transport, storage and communications | .. | .. | .. | .. | .. | 415 |
| 8—Health, education and public administration | .. | .. | .. | .. | .. | 956 |
| 9—Services not elsewhere specified | .. | .. | .. | .. | .. | 3,176 |

As compared to the average for the State this district has higher proportions under Divisions 4, 6 and 9.

Among the large scale industries the principal is the sugar industry. Among the cottage industries the principal are hand-loom cloth weaving (cotton), leather tanning, cane-furniture and other bamboo and cane products, *gur* and hemp ropes and *sulli* manufacture.

Variation in the livelihood pattern

13. In the districts of Gorakhpur-cum-Deoria the proportion of population depending on agriculture for their livelihood was 88· 5* per cent. in 1951. The unfortunate fact is that the agricultural proportion has been increasing in the district ever since 1901 when the figure stood at 71· 6 per cent. It was 88· 1 per cent. in 1911 and 91· 8 per cent. in 1921. Only in this census the speed of the process seems to have been arrested. The actual number of persons who depend on agriculture has increased to 3,841,275 in 1951 from 2,997,997 in 1921 or by 28· 1 per cent., while the cultivated area has remained almost unchanged. This has resulted in the progressive fragmentation and sub-division of holdings and pressure on impoverished soil. There appears to have been a gradual decline in village arts and handicrafts. The cumulative result is a fall in the proportion of workers and a corresponding rise in the dependency. The proportion of workers in the total population in 1951 was only 49· 68 per cent. (agricultural 44· 13 per cent., non-agricultural 5· 55 per cent.) against 62· 28 per cent. (agricultural 57· 20 per cent., non-agricultural 5· 08 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 37· 72 per cent. (agricultural 34· 57 per cent., non-agricultural 3· 15 per cent.) in 1921 to 50· 32 per cent. (agricultural 44· 35 per cent., non-agricultural 5· 97 per cent.) in 1951. All this is an index of the increasing unemployment and under employment. It is only by diversion of the population to cottage and other industries that the present severe disequilibrium in the economy of the district can be redressed. (*Vide* Tables B-I, B-II and B-III.)

Houses and households

14. There were 333,128 occupied houses in the district, 320,318 in the villages and 12,810 in towns. That gives an average of 6,337 persons per 1,000 houses or 6· 3 persons per house in the rural areas and 5,685 persons per 1,000 houses or 5· 7 persons per house in urban areas.

*The figure includes earning dependants according to their secondary means of livelihood while the figure of 93· 5 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

There were 364,237 households in the district—350,325 in villages and 13,912 in towns.

| Census year | Persons per 1,000 households of | |
|-------------|---------------------------------|------------------|
| | Rural population | Urban population |
| 1921 | 5,491 | 3,902 |
| 1931 | 5,584 | 3,167 |
| 1941 | 5,836 | 3,186 |
| 1951 | 5,792 | 5,196 |

That gives an average of 5.792 persons per 1,000 households or 5.8 persons per household in rural areas and 5.196 persons per 1,000 households or 5.2 persons per household in urban areas. The marginal table shows the developments in the size of the household since 1921. The rural household is more or less stationary since 1931 and is considerably bigger than the average State rural household (5.07). The urban household has registered a marked increase since 1941.

Out of 5.792 persons in every 1,000 rural households 2,885 are males and 2,907 are females. There is a female excess numbering 22 in every 1,000 households. Out of 5,196 persons in every 1,000 urban households 2,752 are males and 2,444 are females. There is a male excess numbering 308 in every 1,000 households. The type of migration will account for the difference.

Information regarding types of household and household relationship was also collected at this census with the help of a sample of about 4 per cent. According to this, in every 1,000 sample households there are 5,218 persons (males 2,715, females 2,503) in the district. The corresponding figure for the total count is 5,769.

The table below shows the distribution by size of 1,000 sample households.

| Description | | | | | | Small with 3 members or less | Medium with 4—6 members | Large with 7—9 members | Very large with 10 members or more |
|-------------|----|----|----|----|----|------------------------------|-------------------------|------------------------|------------------------------------|
| Total | .. | .. | .. | .. | .. | 310 | 432 | 172 | 86 |
| Rural | .. | .. | .. | .. | .. | 304 | 434 | 175 | 87 |
| Urban | .. | .. | .. | .. | .. | 422 | 391 | 126 | 61 |

Medium households are the dominant type in the villages while small households are more numerous in the towns. Quite a large number of migrants live in towns without families.

Family composition of 1,000 sample households is as follows :

| | | | | | | Number in 1,000 households | | |
|-------------|------------------------------|--|----|----|------------------|----------------------------------|-------|--------------|
| A | { | Hheads of households | .. | { | Males (married) | .. | .. | 705 |
| | | | | | Males (widowers) | .. | .. | 243 |
| | | | | | Females | .. | .. | 52 |
| | Wives of heads of households | .. | .. | .. | 705 | | | |
| | | | | | | | | <u>1,705</u> |
| B | { | Sons of heads of households | .. | .. | .. | .. | 1,133 | |
| | | Daughters of heads of households | .. | .. | .. | .. | 779 | |
| | | | | | | | | <u>1,912</u> |
| C | { | Male relations of heads of households (other than sons) | | | | | .. | 613 |
| | | Female relations of heads of households (other than daughters) | | | | | .. | 949 |
| | | | | | | | | <u>1,562</u> |
| D | { | Persons unrelated to the head of the household | | | | | .. | 21 |
| | | | | | | | .. | 18 |
| | | | | | | | | <u>39</u> |
| Grand Total | | | | | | | | <u>5,218</u> |

Sons outnumber the daughters of the heads of households. The latter leave the homes of their parents after marriage. Females relations (other than daughters) outnumber the male relations (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I.)

15. In the district as a whole the sex-ratio was 1,003 i.e., there are 1,003 females to every 1,000 males. It varied among the tehsils. The lowest value was 944 in Hata tehsil. The highest value was 1,072 in Salempur tehsil. The difference in the latter is the result of male migration. Salempur is one of the densely populated tehsils of the district. The ratio was 989 in Deoria and 1,003 in Padrauna,

Sex-ratio

The sex-ratio is smaller in towns than in villages. For the district as a whole, the sex-ratio in villages is 1,007 (mainly due to male migration), while that in towns is 879.

The corresponding figure of sex-ratio for the district was 966 in 1921, 944 in 1931, 968 in 1941 against 1,003 in 1951. The sex-ratio is steadily rising since 1931.

Age structure

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population separately :

| Age-group | Total population | | | Rural population | | Urban population | |
|----------------------------|------------------|-------|---------|------------------|---------|------------------|---------|
| | Persons | Males | Females | Males | Females | Males | Females |
| Infants and young children | 0—4 | 12·2 | 6·1 | 6·1 | 6·1 | 6·7 | 6·8 |
| Boys and girls | .. 5—14 | 27·9 | 14·7 | 13·2 | 14·7 | 14·4 | 10·8 |
| Young men and women | .. 15—34 | 31·7 | 15·8 | 15·9 | 15·7 | 18·2 | 16·9 |
| Middle-aged men and women | 35—54 | 20·1 | 10·1 | 10·0 | 10·1 | 11·0 | 9·1 |
| Elderly persons | .. 55 and over | 8·1 | 3·6 | 4·5 | 3·7 | 3·1 | 3·0 |

It will be seen that the population is progressive 40·1 per cent. of the population is of age under 15 and only 8·1 per cent. consists of elderly persons. Again, it may be noted that proportionately large number in the working ages (15—54) are found in urban areas. This is the effect of migration of workers to the towns from the villages. (*Vide* Table C-II.)

Marital status

17. Out of every 10,000 persons in the district there are 5,033 males and 4,967 females.* Among them 2,579 males and 1,849 females are unmarried. If we reckon males and females together, the unmarried people are 44·3 per cent. of the population.

Of the males 51·2 per cent. were unmarried, 42·9 per cent. were married and 5·9 per cent. were widowed or divorced. Among females 37·2 per cent. were unmarried, 51·5 per cent. married and 11·3 per cent. were widowed or divorced.

Of the married males 4·0 per cent. were of ages below 15, 48·7 per cent. were of ages 15—34, 37·1 per cent. were of ages 35—54 and 10·2 per cent. were of ages 55 and over. Among the married females 10·9 per cent. were of ages below 15, 52·8 per cent. were of ages 15—34, 29·1 per cent. were of ages 35—54 and 7·2 per cent. were elderly women.

Marriage is universal. Among males and females aged 35 years and over only 8·5 per cent. of males and 1·8 per cent. of females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is still prevalent. 4·1 per cent. of the males of ages 0—14 and 14·4 per cent. of females of ages 0—14 were returned as married. (*Vide* Table C-III.)

Languages

18. Over 99·96 per cent. of the people of the district returned Hindi, Hindustani or Urdu as their mother-tongue. Among the other mother-tongues spoken, the main are Punjabi (0·1 per cent.), Bengali (0·1 per cent.), Nepali (0·1 per cent.) and Rajasthani-cum-Marwari (0·1 per cent.). Of the 21·0 lakhs of the people in the district, only 414 or 0·02 per cent. were bilingual (in an Indian language). Those whose mother-tongue is other than Hindi, Hindustani or Urdu are generally the migrants who are able to speak any of these as a subsidiary language. Persons returning Hindi, Hindustani or Urdu as secondary language were 265 or 64 per cent. of those who were bilingual in some Indian language. (*Vide* Table D-I.)

Religion and special groups

19. Out of 10,000 population of the district the number of people belonging to different religions is : Hindus 8,961, Muslims 1,035, Sikh 1 and Christians 3 ; of 10,000 population in villages the numbers are : Hindus 8,990, Muslims 1,007 and Christians 3 ; and of 10,000 population in towns the numbers are : Hindus 8,156, Muslims 1,816, Sikhs 13 and Christians 15. Muslims, Sikhs and Christians are concentrated in the urban areas of the district as is the case in the other units of the State.

There are 286 thousand Scheduled Castes in the district. Their number per 10,000 works out to 1,359. In villages they are 1,382 for every 10,000 and in the towns their number per 10,000 is only 702. In the district there are only 24 Anglo-Indians. (*Vide* Tables D-II and D-III.)

Displaced persons

20. The number of displaced persons in the district at the census was only 553 (males 303, females 250). (*Vide* Table D-V.)

Literacy

21. The percentage of male literacy was 13·2 in the district while that of female literacy was 1·7 only. In Gorakhpur-cum-Deoria the percentage of literates among males in 1951 was 14·3 as compared to 5·5 in 1931 ; among females the percentage of literates in

*The corresponding figures for the total count are 4,993 and 5,007.

1951 was 1·9 as against 0·4* in 1931. On January 1, 1951, there were 708 primary schools in the district with enrolment of 76,285 pupils. (*Vide* Table D-VII)

C—EXPLANATORY NOTE ON THE STATISTICS

The statistics in this volume have been presented in three parts :

- I—District Census Tables
- II—Village, Town, Pargana and Thana Statistics
- III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, "Agricultural Statistics", from the Annual Season and Crop Reports, Table 3, "Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, "List of Primary Schools", from information specially supplied by District Inspector of Schools.

2. The census data presented here has been derived from the census slips by a process of sorting, compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

Processing of
census data

Agricultural Classes—

- I—Cultivators of land wholly or mainly owned ; and their dependants
- II—Cultivators of land wholly or mainly unowned ; and their dependants
- III—Cultivating labourers ; and their dependants
- IV—Non-cultivating owners of land ; agricultural rent receivers ; and their dependants

Non-agricultural Classes—

- V—Production (other than cultivation)
- VI—Commerce
- VII—Transport
- VIII—Other services and miscellaneous sources

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately, while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (a) *rural tracts*, comprising the rural population of each tehsil, (b) *urban city tracts*, comprising the population of areas which had been declared as cities, (c) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise), while the district-wise data for the whole State is contained in the following State volumes :

Tracts

- Part I-B—Subsidiary Tables
- Part II-A—General Population Tables
- Part II-B—Economic Tables
- Part II-C—Age and Social Tables

*In Gorakhpur-cum-Deoria the numbers per mille (of the 10 per cent. sample population) of each sex aged 5 years and over who were returned as literates are as below :

| Males | | Females | |
|-------|------|---------|------|
| 1951 | 1931 | 1951 | 1931 |
| 167 | 64 | 26 | 5 |

Explanatory
notes

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

Table A-I—Column 5 relating to “hamlets” has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a “hamlet”.

A clear distinction has been made in this census between a “House” and a “Household”. A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under “Occupied Houses” used to be that of households, while the figures under columns 7—9 of the present table refer to occupied census houses as distinct from households.

The Economic Tables—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

Table B-I—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows :

- (i) Self-supporting persons ;
- (ii) Non-earning dependants ; and
- (iii) Earning dependants.

These were defined in the Instructions to Enumerators as follows :

“A ‘self-supporting person’ is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be ‘self-supporting’ a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a ‘self-supporting’ person in this sense is a ‘dependant’. A ‘dependant’ may be either an ‘earning dependant’ or a ‘non-earning dependant’. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an ‘earning dependant’. A person who does not earn any income either in cash or kind is a ‘non-earning dependant’. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a non-earning dependant. Each of them should be classed either a ‘self-supporting person’ or ‘an earning dependant’ according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her Economic Status is that of a non-earning dependant, if she does not also earn an income, and should be recorded as such.”

Economically active, Semi-active and Passive persons—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include “unpaid family workers” or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of livelihood.)

All self-supporting persons are, ordinarily economically active with the exception of the following classes and groups :

(a) All self-supporting persons of Agricultural Class IV.

(b) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

- (i) Persons living principally on income from non-agricultural property ;
- (ii) Persons living principally on pensions, remittances, scholarships and funds ;
- (iii) Inmates of alms-houses and recipients of doles ;
- (iv) Beggars and vagrants ; and
- (v) All other persons living principally on income derived from non-productive activities.

Table B-II—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal

means of livelihood. For an earning dependant it is the source from which he secures his own income. where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

Table B-III—"Employers", "Employees" and "Independent Workers" have been defined as follows in the Instructions to Enumerators :

An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.

An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as employers.

An "independent worker" means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood. (Sweepers, *dhobies*, *kahars*, etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes "employee". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become "employees.")

Tables C-II, C-III, C-IV and C-V—The figures presented in these tables are based on single year age returns and have not been smoothed.

Tables D-V (i) and (ii)—For the purpose of these table a "displaced person" has been defined as follows :

"A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan".

PART I

DISTRICT CENSUS TABLES

A—GENERAL POPULATION TABLES

A-I—Area, Houses and Population

| Serial number | Occupied houses | | | | | | | | | | |
